-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitations "the step of providing the flow of conduction fluid" in lines 1-2 and "the instrument" in line 2. There are insufficient antecedent bases for these limitations in the claim or from the preceding claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Schlie (US 5,235,251). Schlie shows a vessel 43 containing reactants in the region 49 (column 5, lines 4-7, i.e., nitrogen, inert gas, molecular gas, vaporous metal or halide salts) at which energy source 41 other than conduction heating of the vessel or the reactants (i.e., microwave source) is applied to the reactants in the vessel 43 while a hydraulic cooling fluid is for concurrently cooling the vessel 43 by conduction by contacting the exterior of the vessel with the fluid (i.e., at the region 53 in the cooling jacket 51), wherein a flow of gas (or air) is directed to the vessel by source 45 and vacuum 47. It is inherently that vacuum 47 must include a fan or motor in order to provide the flow of gas (i.e., by compression).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Jennings et al (US 5,796,080), Barclay et al (US 5,972,711), Jennings (US 6,753,517), Hayes et al (US 6,744,024 and US 5,721,123), and Collins et al (US 2004/0020923).

Claims 6-20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not show the vessel is concurrently cooled by the flow of the conduction fluid against the vessel and the temperature of the vessel or its contents is concurrently monitored in the manner recited in claims 6 and 13.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu Ba Hoang whose telephone number is (571) 272-4780. The examiner can normally be reached on Mon-fri from 8:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on (571) 272-4777.
